PROJECTS

InstantMania - Full-Stack | Design | Photography   *https://instantmania.vercel.app/*

• Single-handedly managed all project phases from concept to completion, delivering a high-quality, maintainable codebase through proactive refactoring and optimization practices.

• Established a continuous feedback loop with active user forums and community engagement, leading to a prioritized roadmap of features and improvements informed directly by user requests. Highlighting strong community building and responsiveness to user needs.

WORK

Arbor Diagnostics   *Apr 2023 - current*

• Proficient in the art of precise tissue preparation and documentation, demonstrating a mastery of detail that contributes to accurate diagnosis and stringent quality control.

• Possess exceptional skills in interpreting complex laboratory and staining protocols, tackling processing challenges with ease, and optimizing workflows for improved efficiency.

• Collaborates seamlessly with pathologists, staff, and healthcare professionals to foster a cooperative environment that ensures the delivery of accurate and reliable patient results.

MoveOn's Spoke Open Source Project   *Feb 2023 - Mar 2023*

• Worked with a diverse team of developers to implement new features, troubleshoot issues, and enhance code performance.

• Participated in code reviews, providing constructive feedback to peers and ensuring code quality and adherence to project standards.

EDUCATION

Turing School of Software & Design   *Jun 2022 - Mar 2023*

Front-End Engineering Certificate

• Demonstrated exceptional dedication and commitment to mastering frontend technologies, culminating in an impressive 10000+ hours of hands-on programming experience, exceeding program requirements and showcasing a passion for continuous learning.

• Successfully completed an ACCET-accredited software development program, earning accolades for consistent excellence in frontend development coursework and projects, while actively engaging in collaborative learning environments.

• Facilitated seamless teamwork by actively participating in cross-functional collaboration, engaging with diverse perspectives, and fostering an open and constructive environment, resulting in an outstanding level of team cohesion and highly effective problem-solving.

Tarrant County College   *Aug 2018 - Current*

Graphic Communications, A.A

• Developed a strong foundation in design principles, color theory, layout composition, and typography through completing over 50 hands-on projects and assignments.

• Utilized industry-standard software and tools to create engaging visual content, including illustrations, branding materials, and website layouts.

• Adapted to evolving design trends and technologies, ensuring proficiency in the latest software and keeping up-to-date with industry best practices.
